

Vision's online Electronic Bill Payment and Presentment solution is an integrated offering within our software. System users have complete access to all current and historical bills and payments. Your customers can pay by electronic checking account withdrawal, credit card, ACH and check 21. All payments are received electronically into Vision Cash Management eliminating the need for manual data entry. Payments are deposited directly into your bank account for fast secure processing.

Bill Pay Features

- ❑ Automated syncing of utility bills
- ❑ Paperless presentment of bills and emailing of notifications
- ❑ Automated updating of your Financials and Utilities
- ❑ Reporting Services Integration

Automated Electronic Bill Presentment and Payment improves your customers experience receiving and paying their bills; through recurring payments and paperless notifications. Automated Online Payments saves you time and money; through pre-programmed web service calls to sync your system with the online portal and each customer that opts into paperless billing saves you money compared to printed billing.
