

# Information Services Options

## Virus/Malware/Spyware Removal and Repair:

Vision IT deals with these unwarranted attacks on a daily basis, thus developing techniques to best deal with these unwanted disruptions. Our team will attempt to remove the triggers and restore your system to its pre-virus condition. However our best business approach is to provide services that prevent attacks, from hardware to software solutions. Vision IT can help prevent most viruses and attacks from ever getting to your systems.

### ➤ Best solution is to avoid the potential threats

- Genuine Firewalls not just NAT protection
  - SonicWall
  - Cisco
- Safe Internet and email practices
- Web and Email Scanning by Partners who are specialists
  - McAfee SaaS programs
  - Symantec Enterprise Solutions

### ➤ Unavoidable threats solutions

- Utilize tried and proven methods for identification to eradication, get the triggers (SuperAntispyware, Malwarebytes, Security Essentials)

### ➤ Vision IT will keep non-productivity to minimums

---

## Computer Support Packages:

Vision IT understands the need for immediate support for your office IT needs, but we also know that the expense of a full time IT staff can be cost prohibitive and unnecessary on a full time basis. That's why we offer several Information Service Solutions designed to fit the unique needs of your organization.

---

## Maintenance Programs and Services:

Not sure which services become necessary, let Vision IT help you with putting together a strategy for taking care of your equipment needs. We understand that each and every organization may need different services which allow us to customize a specific package for you. Many times we are asked to provide more services with less funding and our answer is to take advantage of current technologies to accomplish this.
