

Vision permits provides custom forms, custom mapping, and GIS integration in addition to the tracking standards you deserve. Vision Permits allows you to track the permitting process from start to finish. Our Permit Manager allows you to create or select existing Applicants and Contractors all from the same screen. Then your Fee Schedule and Conditions will be automatically loaded based on the Permit Type you select.

Vision Document Management is built in to Vision Permits to seamlessly add, edit, and view all documentation attached to a Permit. Also included will be custom linking to your existing Parcel data and State Contractor License system. You can also provide an Inspector Portal and an Inspector Mobile App to improve in the field accuracy. Finally you will have Custom Mapping utilizing today's best technologies of GIS Integration and Shape Files.

Security and data integrity are inherent in our architecture by leveraging the power of Microsoft SQL Server. Transaction triggers record every aspect of a transaction and intelligent reporting provides the audit tracking for financial accountability.

We look forward to answering any questions about what we covered or what you wish to learn more about.
